# BETTER WATCHMAN FOR LIFETIME

WITH YOUR WATCHMAN'S ONE YEAR SALARY

Control Panels

Hub is the control panel of a security system. The hub manages all Ajax devices, operates security modes, and in case of a threat, notifies an alarm response centre as well as you.

HomeSiren

Wireless indoor siren that loudly notifies of an alarm during detector activation. It is installed indoors to warn of danger or deter intruders.

Water Tank Automation

our water tank automation system prevents the loss of water by turning off the motor once the tank is filled and turn on the motor one's the water is below threshold.

MotionCam

We have combined special optics with a software filter for false alarms in motion detectors. Along with a professional installation, it gives high detection accuracy.

DoorProtect

Wireless opening detector that notifies of first signs of room intrusion by means of a broken door or window. It can be mounted on all types of doors including a metal base.
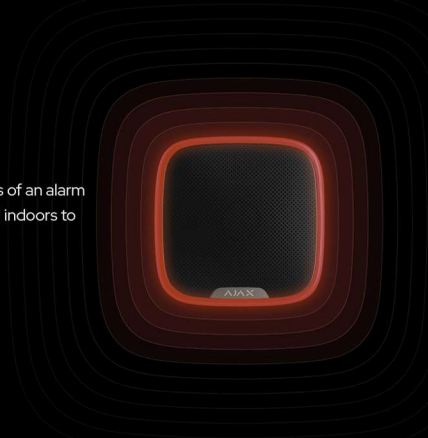

Monitoring station

Your control panel registers an emergency event and sends a signal to the central monitoring station, where the appropriate authorities are notified and sent to your home.
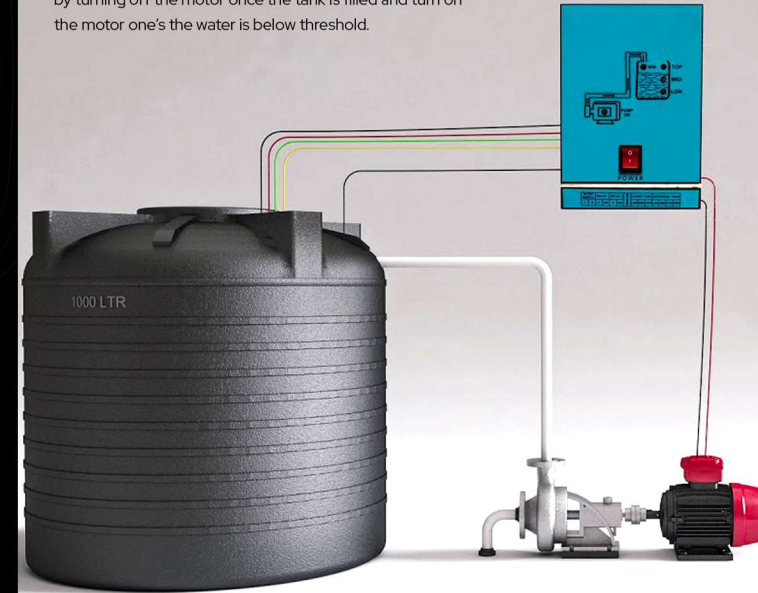

Gardening Automation

Regularly waters your garden by turing on and off the sprinklers on time every evening even in your absence

DualCurtain

DualCurtain Outdoor controls your property perimeter without creating obstacles for people who are already inside. Two independent optical systems with narrow viewing sectors and flexible settings allow you to accurately adjust 30 meters of the detection zone, excluding possible sources of false alarms.

Mobile App

One app for security, gate, water tank and garden management of your home
